

Cambridge Checkpoint Examination Results – 2012

GSIS has once again demonstrated that the school chases its own excellence every year. The Cambridge Checkpoint Examination result is another pointer towards this.

Mathematics results were outstanding with six students scoring 6 – the highest possible score in the subject. The science subject did not fall behind, as the average score in the subject was the highest.

Neha Bhojwani made us proud by scoring the highest total of 16.2, also scoring the highest in English. Paarikshit Vikas Ganerwal also scored the highest total of 16.2.

Medha Khanna, the top scorer in both Science and Mathematics stood second with the score of 15.8.

Parth Bansal stood a close third with the score of 15.2

We are proud of our top scorers and hope that they will inspire our present batch to achieve new heights.
